INTRODUCTION

Power Rack, headquartered in Bahra industrial area, KSA, is one of the leading companies providing integrated warehousing solutions and is a trusted partner in logistics industry. The company that started from humble beginnings since its inception in 2012 has grown to become one of the largest independent manufacturer and distributors of industrial storage systems including all related accessories and any equipment in storage and handling solutions. We are a proud member of the Electric House family of companies who's history stretches back 60 years to 1955. The Group's brand image diversified portfolio, market share as whole, infrastructure, financial strengths and confidence provides enchanting experiences to customers, vendors, and employees.

Our consultative and integrated solutions approach along with quality products we offer have made the company known and recognized highly by all its customers for exceptional quality assurance, innovative ideas, outstanding products and excellence in customer service. The one element that runs consistent throughout all our companies is that we continuously strive for the best quality in everything we do and we always improve and develop ourselves.

POWER RACK FACTORY

Manufactures high quality Storage Systems, custom made steel fabricated items and related accessories. State-of art Factory adhering to International Standards ISO 9001: 2015 and TÜV SÜD. The storage system complies with EN15512, FEM & SEMA standards. All the products in Power Rack have been studied and tested by TÜV SÜD and a conformity certificate and test certificates have been issued.

Power Rack covers the main markets of GCC, Africa & MENA Region. The company serves the needs of many industrial sectors engaged in the field of:

Manufacturing industries, E-commerce industry, Freight forwarders, Third party logistics, Cargo and Courier companies, airports, sea ports, dry ports, FMCG's, Pharmaceuticals, Distribution Centers, Retail and Automotive, Hospitality Industry, Banks, Contractors, Furniture & Interior Design, Government Departments, Medical Centers and Hospitals, Oilfield Petroleum, Supermarket, Shopping Malls, and many more.

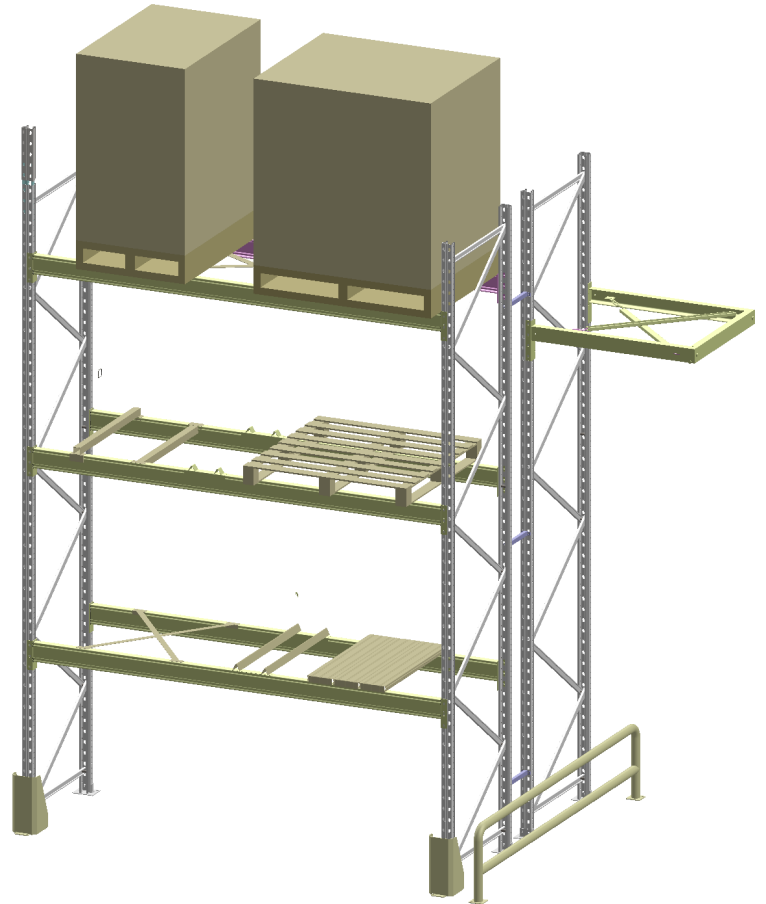

Our highly experienced and skilled staff will be delighted to consult and cater your business needs.

Please call us for free consultation on your storage and handling operations!

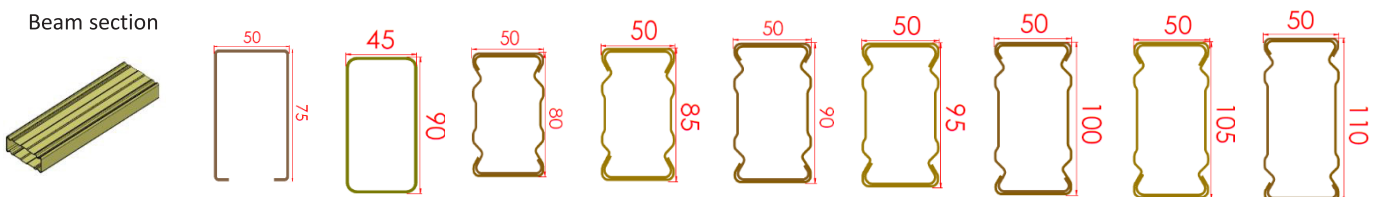

RANGE OF PRODUCTS

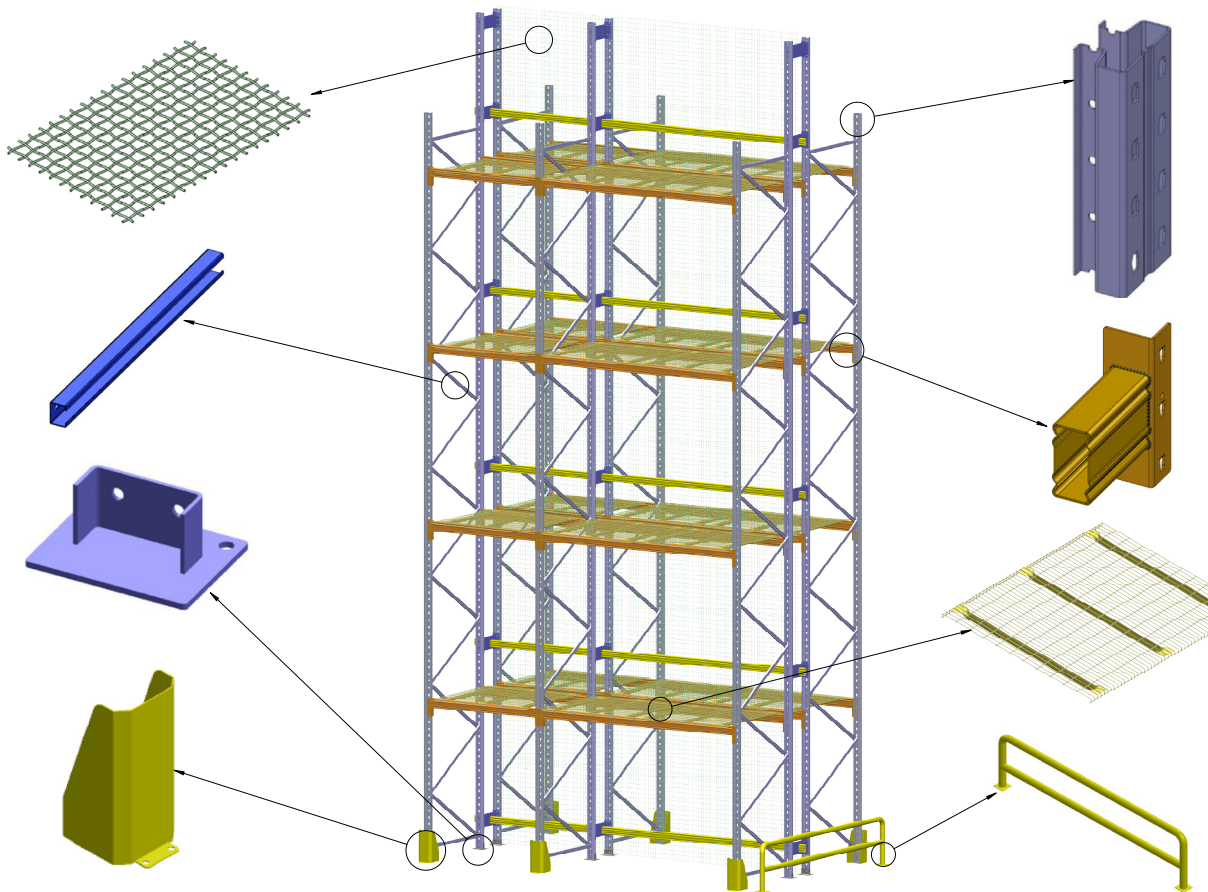

SPR AND VNA PALLET RACKING SYSTEM

SPR - Selective Pallet Racking system provides 100% selectivity and access to all SKU. Modular adjustable system, suitable for various storage operations and accessible with almost all kinds of material handling equipment's. SPR is the most standard system used worldwide in vast majority of storage applications with possibilities of many optional accessories.

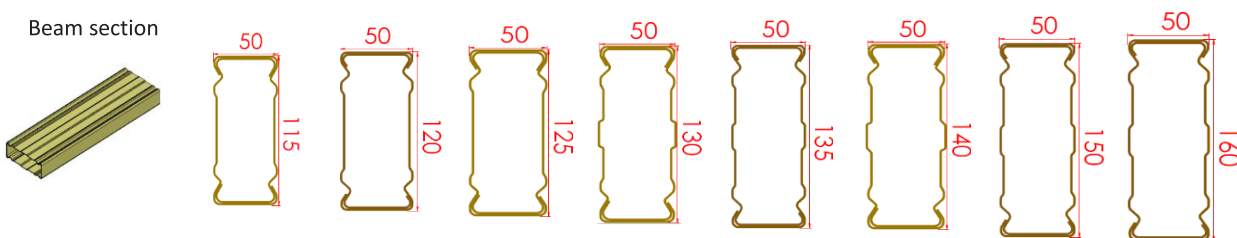

Beam section

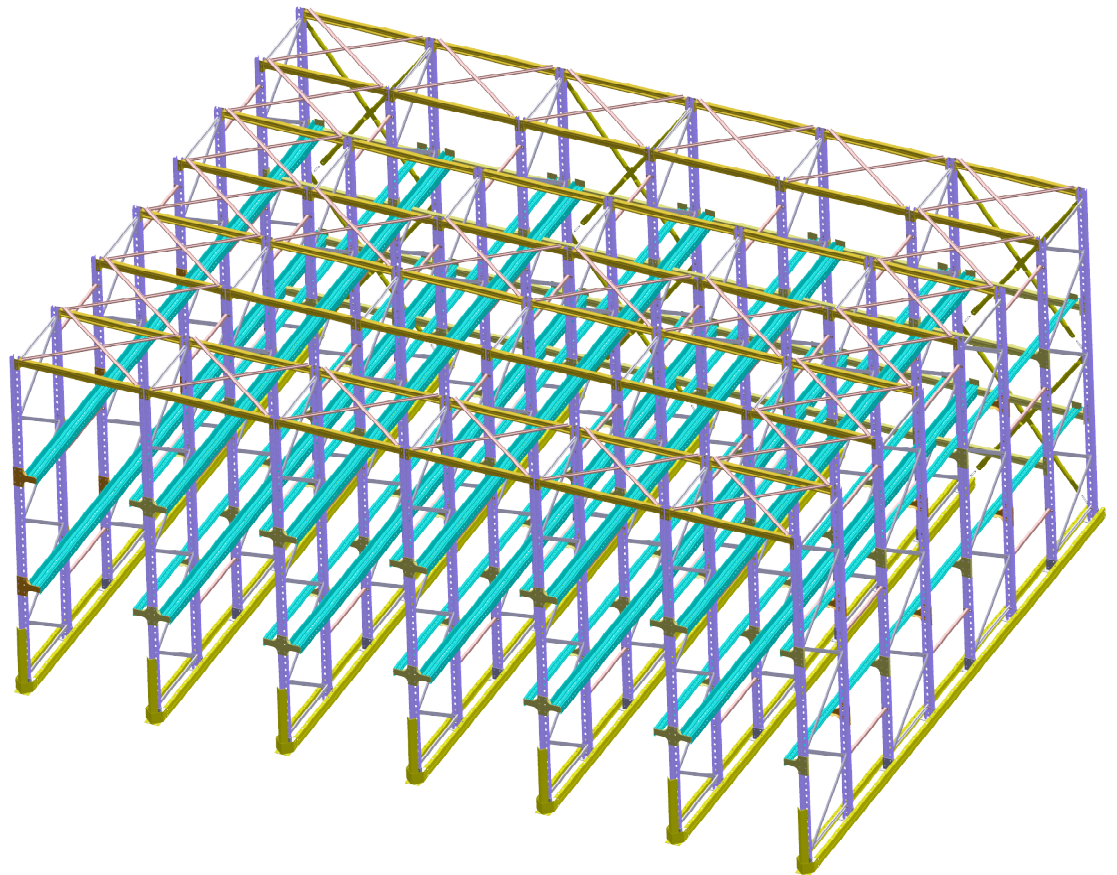

VNA - Very Narrow Aisle Pallet Racking system also provides 100% selectivity dense storage with increased footprint by applying Narrow aisle access. High Rise VNA storage system is also one of the key advantages aimed by many customers due to faster operational efficiency with guided drive system. Customer achieve higher outputs with safe movements. System can also be designed for order picking needs along with pallet replenishment. Equipment used is VNA & order pickers. Ideal for 3PL, freight forwarders, manufacturing, and many other applications.

Beam section

DRIVE-IN PALLET RACKING SYSTEM

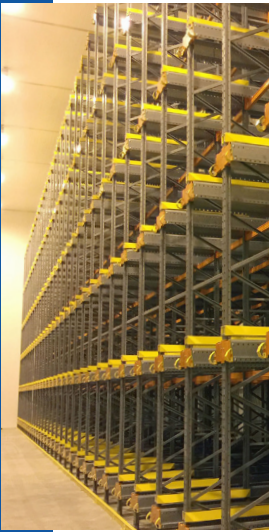

Drive in / Drive Through - Drive in Pallet Racking provides very compact storage by eliminating maneuvering aisles and optimizes more than 75% of the available area. Very limited selectivity enable systems to be used for large SKU of same articles and can be designed as *FIFO or *LIFO. Ideal for Cold storage and temperature controlled warehouse operations where energy savings are vital. MHE used are ECB, special Reach trucks.

*FIFO: First in first out.

*LIFO: Last in first out.

SHUTTLE PALLET RACKING SYSTEM

Pallet Shuttle Racking - Advanced version of drive in system where a pallet shuttle cart drives in the racks instead of MHE providing faster operation times and highly reduce the chances of in rack accidents with less pickers. Semi-automated system also provides better storage allocation of each deep location compared to full lane dedication in drive in system. System enables users to modernize their operations with high throughput efficiency along with much reduced racking maintenance costs. Shuttle system can be used for multiple shifts with spare batteries and also helps in stock keeping. System can be programmed as FIFO or LIFO and provides quick ROI.

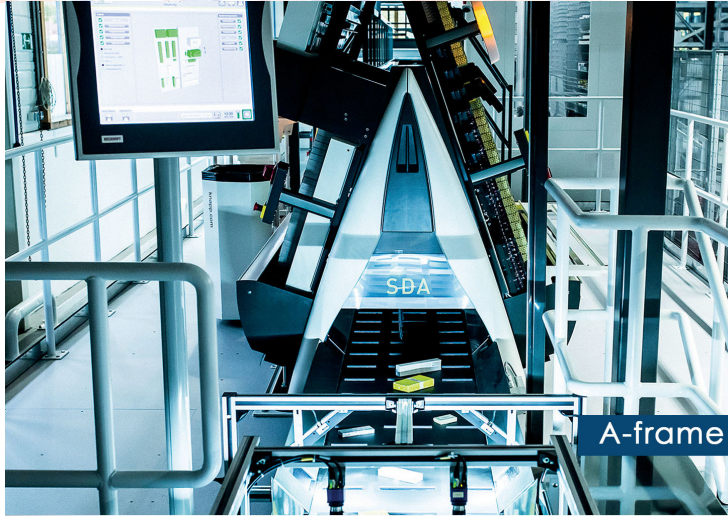

MOBILE RACKING SYSTEM

Mobile Racking System - Semi automated, dense storage system with almost 100% selectivity. System works on motorized and guided mobile base system on rails. With all safety features in action, system provides higher space utilization by elimination multiple aisles. Accessed by remote controls and provides night mode for better cooling circulation. ECB, Reach Trucks and stackers can be used. Ideal solution for cold stores and freezers where aim is to maximize energy utilization.

PUSH-BACK PALLET RACKING SYSTEM

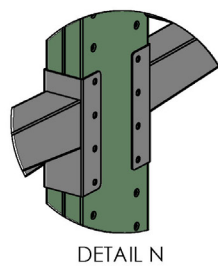

Push Back Racking System - is ideal for medium rotation SKU's with single loading/unloading point from the front and works on *LIFO principle. Loading operation is achieved by applying force on the pallet and moving to rear end of the system. Unloading happens with gravity flow. Used mostly in dispatch or collection areas with limitation of 6 deep maximum.

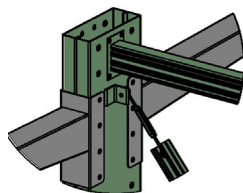

*Last in First Out.

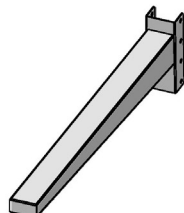

CANTILEVER RACKING SYSTEM

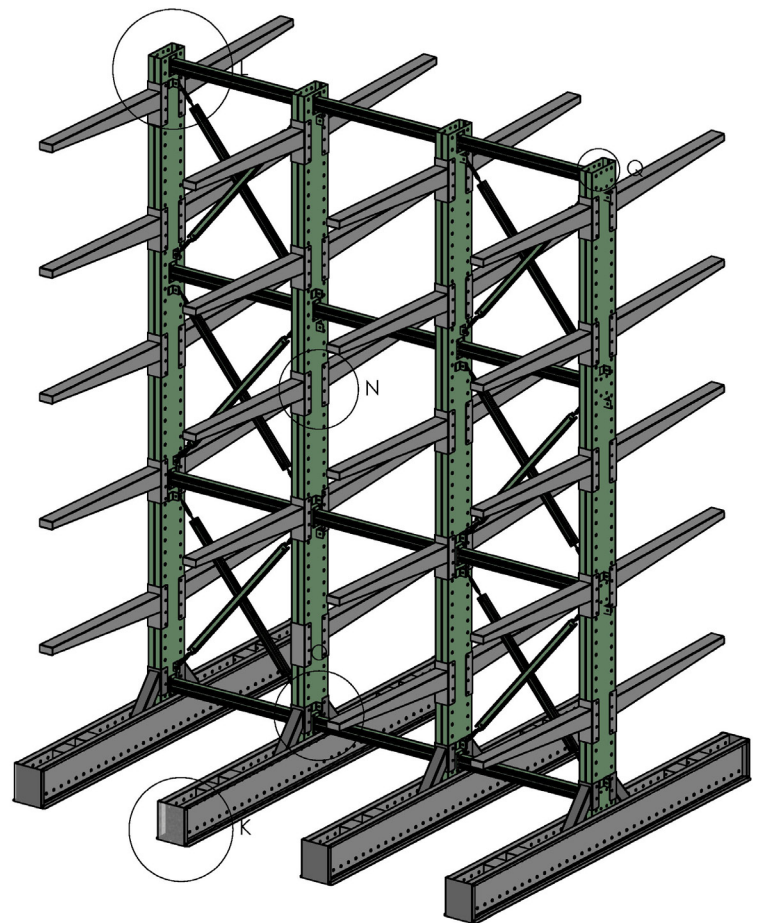

DETAIL N

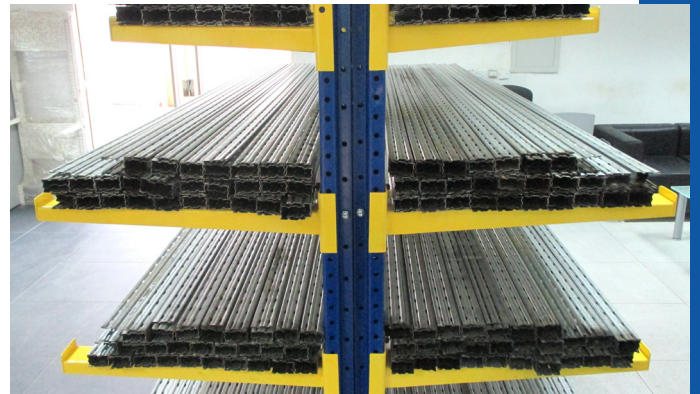

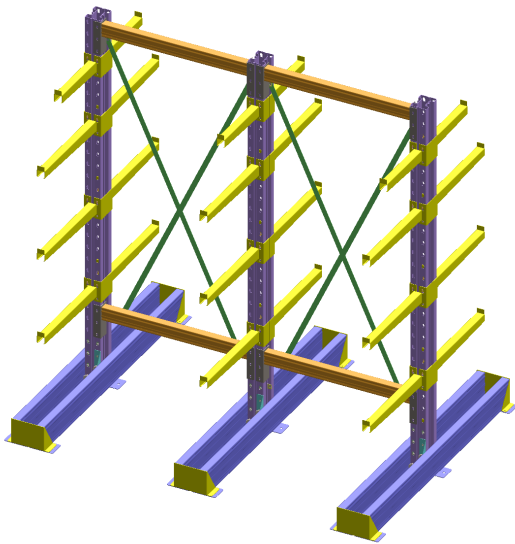

DETAIL L

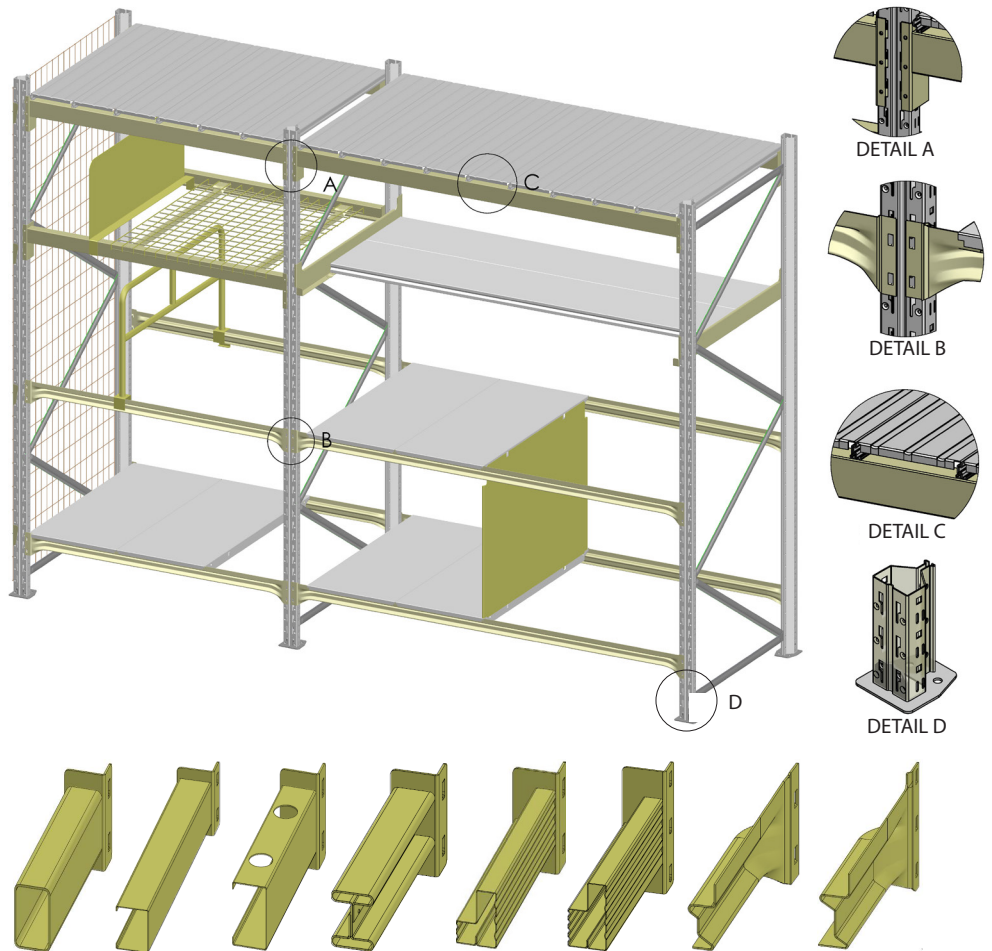

DETAIL ARM

Cantilever Racking System - Specifically designed for storage of items with larger lengths like beams, pipes, metal profiles, wood, carpets, textiles, etc. System is built using strong base, vertical columns and unique cantilever arms. Loading can be done via various lifting systems like cranes, side loaders and standard MHE's.

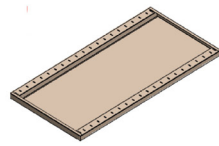

MEDIUM DUTY SHELVING SYSTEM

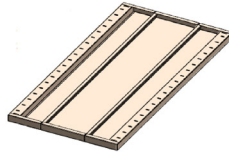

Medium Duty Shelving System - traditional shelving system used for storage and picking of light and medium duty products like plastic bins, cartoon, boxes, parts, merchandising, supermarkets, archiving, back stores, etc. It provides wide range of accessories with versatility to suit various businesses. Bolt free shelving system easy to assemble and adjust. Multi-tier system can be used for optimizing height and meeting fulfillment centers demands.

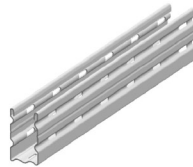

LIGHT DUTY SHELVING SYSTEM

Back Panel Clamp

Light Duty Shelving System - traditional shelving system used for storage and picking of light and medium duty products like plastic bins, cartoon, boxes, parts, merchandising, supermarkets, archiving, back stores, etc. It provides wide range of accessories with versatility to suit various businesses. Bolt free shelving system easy to assemble and adjust. Multi-tier system can be used for optimizing height and meeting fulfillment centers demands.

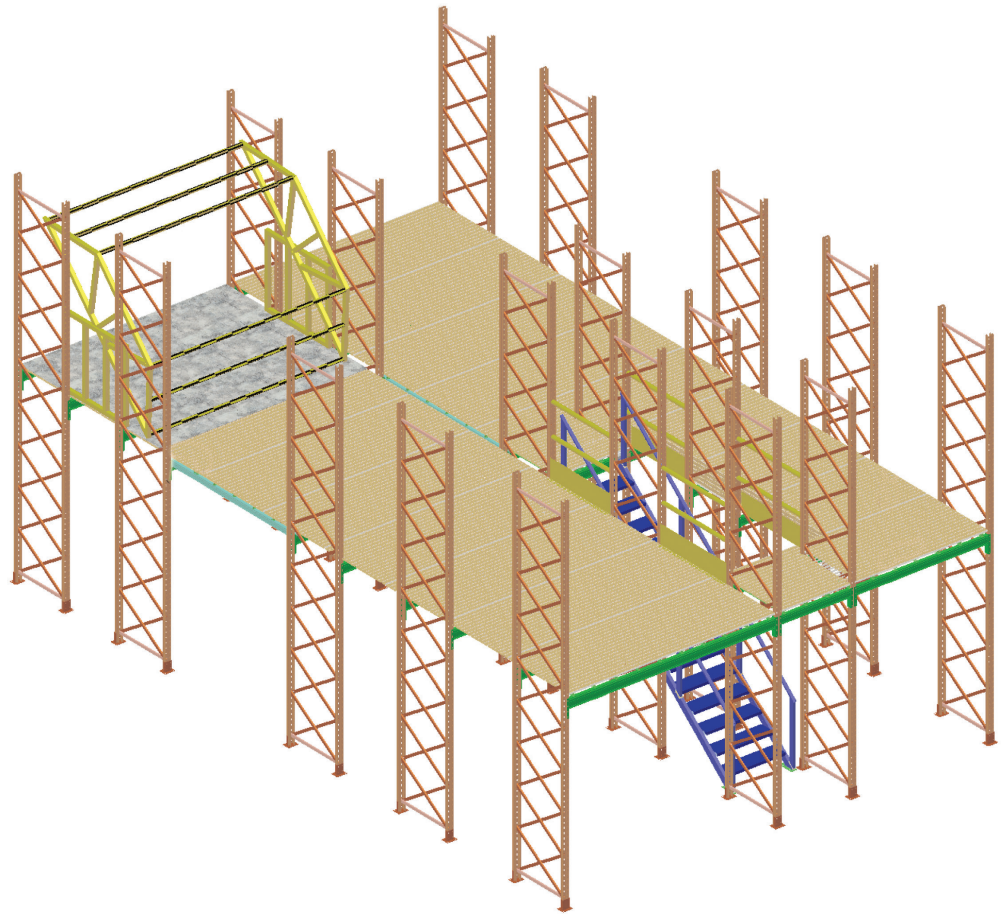

LIGHT DUTY LONG SPAN SHELVING SYSTEM

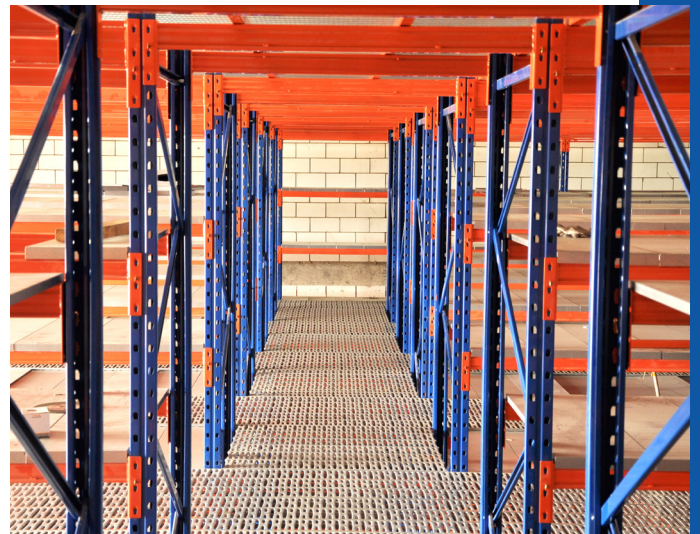

Light Duty Long Span Shelving System - traditional shelving system used for storage and picking of light and medium duty products like plastic bins, carton, boxes, parts, merchandising, supermarkets, archiving, back stores, etc. It provides wide range of accessories with versatility to suit various businesses. Bolt free shelving system easy to assemble and adjust. Multi-tier system can be used for optimizing height and meeting fulfillment centers demands.

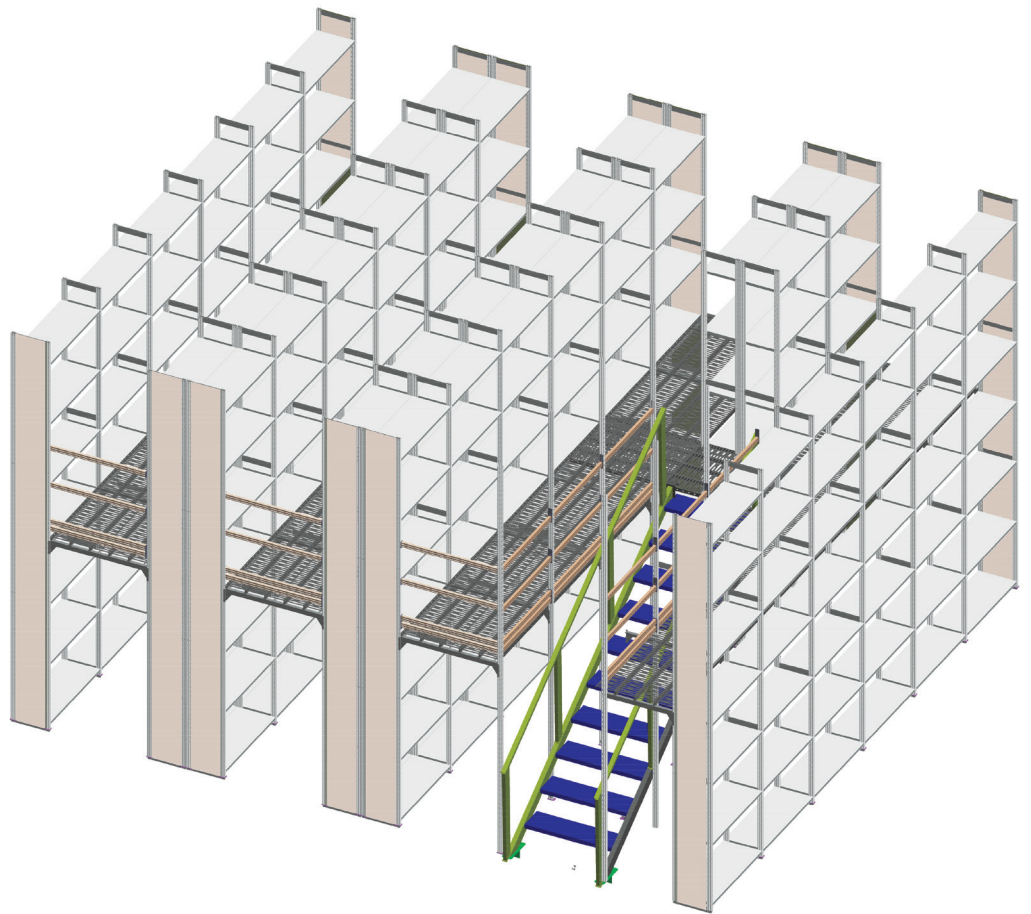

MULTITIER MEDIUM DUTY RACKING SYSTEM

Multitier Medium Duty Racking System - Used frequently for order picking of medium to heavy SKU's. System can be equipped with various decking options like solid / wire mesh decking panels. High rise system can be used in combination with order pickers for height utilization.

MULTITIER LIGHT DUTY SHELVING SYSTEM

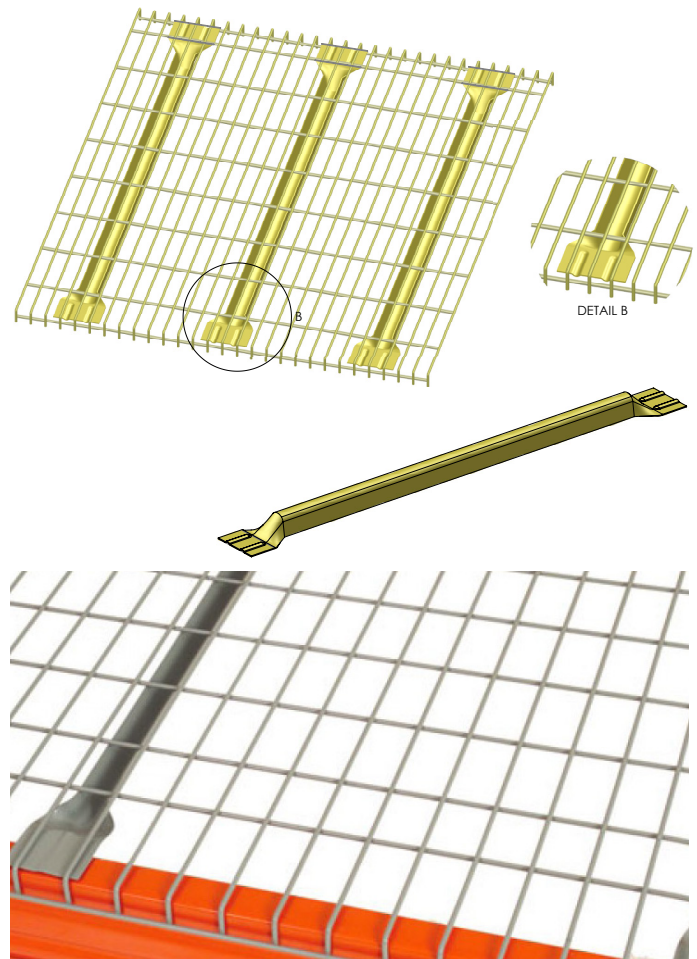

Multitier Light Duty Shelving System - Used frequently for order picking of light to medium SKU's. System can be equipped with various decking options like solid / wire mesh decking panels. High rise system can be used in combination with order pickers for height utilization.

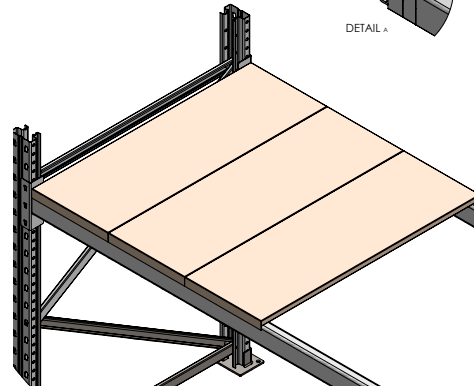

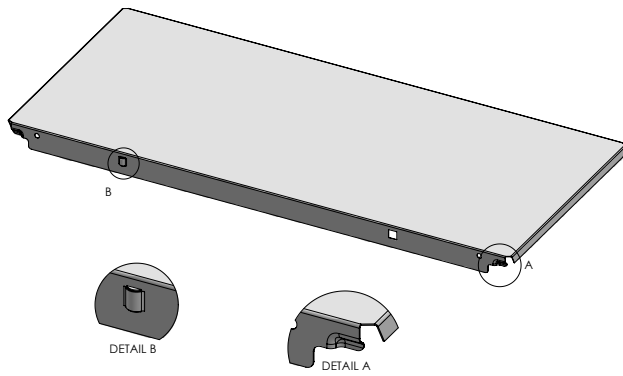

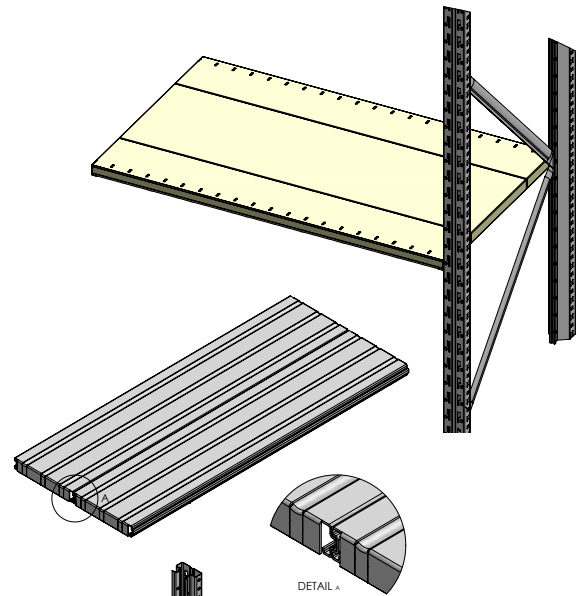

ACCESSORIES

WIRE MESH DECKING PANELS

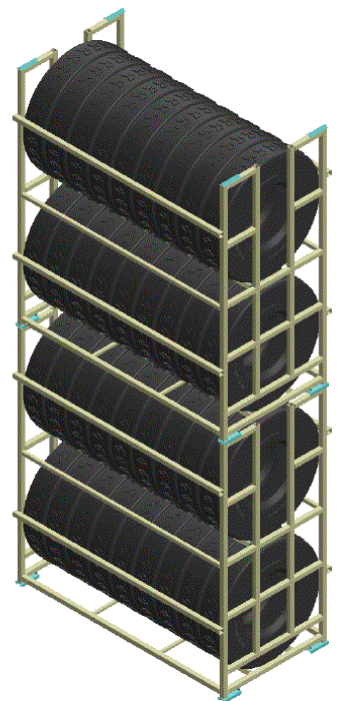

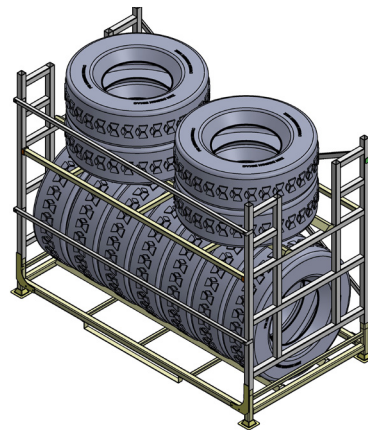

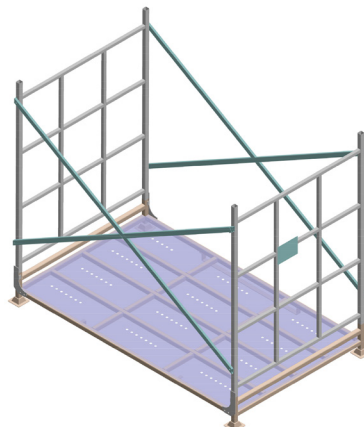

Wire Mesh Decking Panels - Widely used in storage system and available in various sizes. Special hot dip galvanized finish available. Wire Mesh can also be provided for side and back cladding.

SOLID STEEL DECKING PANELS

Solid Steel Decking Panels - Widely used in storage system and available in various sizes. Supplied in pre-galvanized or power coated finish. Customized perforations possible.

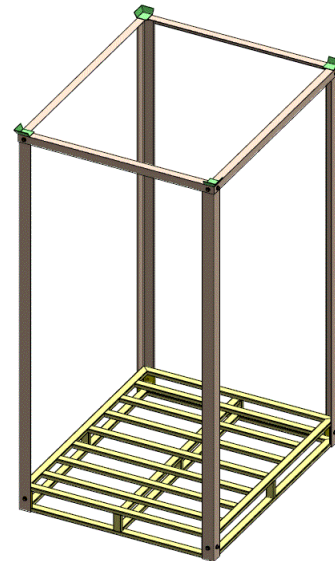

CONVERTIBLE TYRE STEEL PALLET

Convertible Tyre Steel Pallets - Produced and designed for any kind of tires (Passenger cars and Trucks). Available in hot-dip galvanized or powder coating.

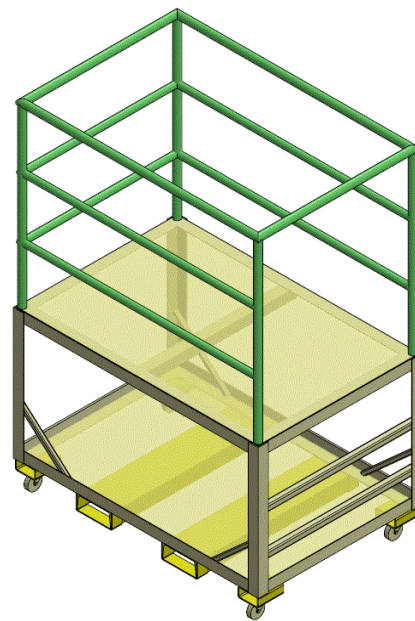

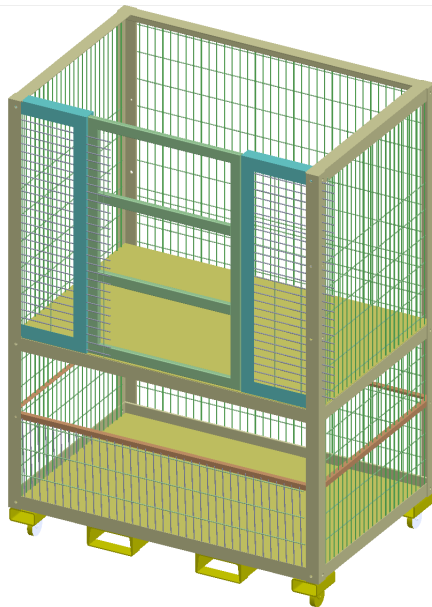

CONVERTIBLE STEEL PALLETS FOR FREEZERS

Convertible Steel Pallets - Produced and designed for various type of storage requirements. Available in hot-dip galvanized or powder coating. Can be used with wooden/plastic pallets as well.

PICKING TROLLEYS AND CAGES

Picking Trolleys and Cages - Tailor made based on customer requirements. Used in customized and wide range of industries.

CUSTOMIZED FABRICATIONS

Customized Fabrications - All kind of customized fabrications can be furnished at our start of art manufacturing facility. Please get in touch with our sales consultants for any special requirements.

PLASTIC BINS

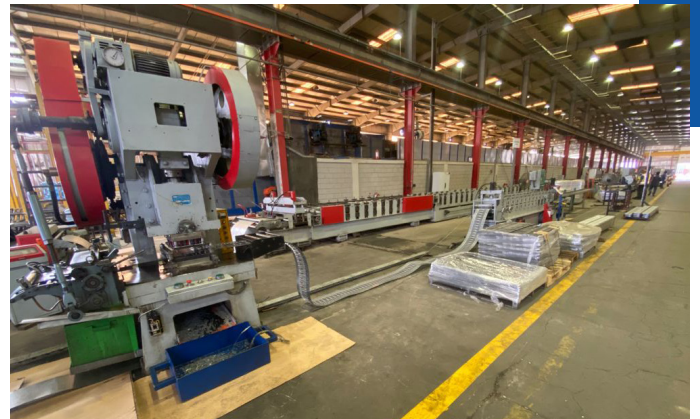

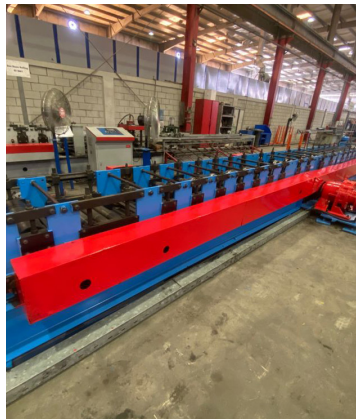

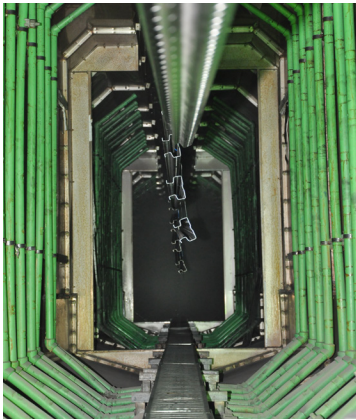

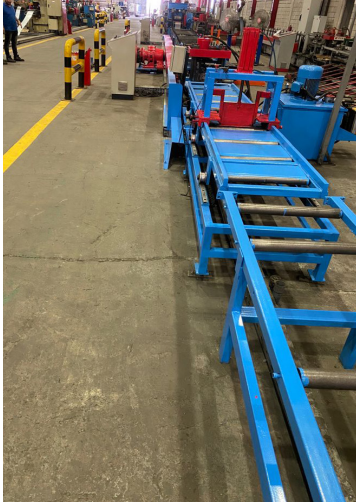

Plastic Bins - Used in vast range of industries for storage and picking requirements. Available in various sizes and options.

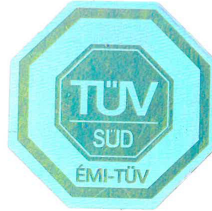

FACTORY

CERTIFICATE

ÉMI-TÜV SÜD

Quality Assurance and Safety Technique Ltd.
(2000 Szentendre, Dózsa György st. 26. - Hungary)

as a certification body operating in accordance with
MSZ EN ISO/IEC 17065:2013

by the request of

POWER RACK FACTORY
(Kingdom of Saudi Arabia, P.O. Box #11967 Jeddah - 21463)

on the basis of the result of the certification procedure

certifies that the

Heavy Duty Pallet Racking System
